

1. Open up the PDF file in Preview instead of the default Acrobat Reader
 - a. To open with Preview (control-click on the pdf, open with, choose Preview).

- b. You can also find Preview in Applications, then open the pdf from where you saved it.
2. When the PDF is opened in Preview, select Print, and under Pages choose the range of pages you need to extract.

3. In the lower left of the print window click PDF, open PDF in Preview.

4. The page or pages will open up in a new Preview window.
5. Select Save from the file menu to save the extracted page or pages.
